Forecast for Saturday 01 Jul 2023

Weather: Further drizzle during the early hours but turning drier by dawn. A fair amount of cloud during the first part of the morning with a chance of occasional light and drizzly showers. Cloud amounts reducing through the day and turning increasingly dry and sunny. A blustery day with some strong winds on the summits.

Chance of cloud-free hill tops above 600m: 30% increasing to 100%.

Low cloud and visibility: Periods of cloud above 500-600m first thing, soon breaking and lifting clear of the summits. Generally excellent visibilities with superb air clarity and distant views of far-away mountains and landmarks, however locally poor or very poor in cloud during the first part of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

An unusually blustery day for early July with gusts of up to 40 mph possible at times, especially during the afternoon. The strongest winds will be over the summits and east of major ridges. Despite the brisk winds giving a somewhat cool feel; with high UV levels, remember your sun protection and to stay hydrated.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Thu 29 Jun 2023	2.6mm	7mm	8.2mm

Forecast for Sunday 02 Jul 2023

Weather: Another largely fine day with periods of sunshine and cloudier spells. Perhaps more in the way of cloud developing during the afternoon with a low chance of a shower. Another breezy day with brisk westerly winds on the summits.

Maximum wind: Westerly 20-25 mph gusting 35-40 mph.

Chance of cloud-free hill tops above 600m: 90%

Low cloud and visibility: A few patches of cloud are possible above 700-800m at first, otherwise all cloud will be above the summits. Generally excellent visibilities with superb air clarity and distant views of far-away mountains and landmarks. Locally poor or very poor in any cloud during the first part of the day.

Temperature: **Valleys:** Plus 8 Celsius rising to plus 18 Celsius.
At 600m: Plus 8 Celsius rising to plus 13 Celsius.
Freezing level: Well above the summits.
